DETAILED ACTION

Note: This is in response to Amendment filed 09/29/2006.

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 23-28 and 42 are rejected under 35 U.S.C. 102(e) as being anticipated by Limon (U.S. 6,273,910).

Limon discloses in figures 1, 2, and 10, wherein the entire axial length of the balloon (40) and stent (10) are provided with a coherent coating (includes polymer (col. 8, lines 36-43)) and wherein the stent (10) is formed from a metal tube and coated with polymer (col. 10, lines 52-65); furthermore, wherein the polymer coating can be cross-linked and has pendent zwitterionic.

Allowable Subject Matter

1. Claims 29-40 and 43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
2. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose or suggest the polymer is formed of formula I-VIII as being claimed.

Response to Arguments

3. Applicant's arguments filed 06/30/2006 have been fully considered but they are not persuasive. Applicant's argument with respect to claim 23 has been considered but is moot in view of the new ground(s) of rejection.
